PY 2019 REPORT

JOB CORPS PROGRAM YEAR (PY) 2019 ANNUAL PERFORMANCE REPORT

UNDER THE WORKFORCE INNOVATION AND
OPPORTUNITY ACT (WIOA)

Submitted to:

The Committee on Education and Labor of the House of Representatives and
the Committee on Health, Education, Labor, and Pensions of the Senate

The U.S. Department of Labor is pleased to present the Job Corps Annual Report as required by the Workforce Innovation and Opportunity Act (WIOA), (Pub. L. 113-128). Job Corps is the nation's largest residential, education, and career technical training program for opportunity youth. Job Corps' FY 2020 annual budget is approximately \$1.7 billion, and it has served nearly 3 million youth since its inception in 1964.

The attached Annual Report contains Job Corps' national results on the 32 performance indicators for Program Year (PY) 2019, as well as results by centers, Outreach and Admissions (OA) providers, and Career Transition Service (CTS) providers for specific measures as required by WIOA.

Job Corps' Annual Report is organized as follows:

- The Annual Report provides a summary of the national performance across all 32 indicators for PY 2019 as compared to PY 2017 and PY 2018, identifies the data sources and limitations of the reported results, and discusses anticipated changes to specifications for future reports.
- Appendix A provides the data by center, CTS, and/or OA provider, as required, for the 32 metrics. Specifically:
 - Section I of Appendix A presents all 32 indicators identified in WIOA for inclusion in the Annual Report, along with the specific WIOA citation, the algorithm, the entities (center, CTS provider, and/or OA provider) to whom the indicator applies, whether expected levels of performance, goals, and targets are required, and underlying specifications for PY 2019.
 - Section II presents the national results for the Job Corps program on the 32 indicators specified by WIOA for inclusion in the Annual Report.
 - Sections III and IV present ratings and comparative rankings by center and CTS provider respectively for each of the six primary indicators of performance for eligible youth described in WIOA Section 116(b)(2)(A)(ii) (numbered as indicators 1 through 6 in the Annual Report).
 - Section V presents the results by center for indicators A through N (numbered as indicators 9 through 32 in the Annual Report) as described in WIOA Section 159(d)(1).
 - Section VI presents the results by OA provider for two indicators described in WIOA Section 159(c)(2)(A), two indicators described in WIOA Section 159(d)(1)(I), and three indicators described in WIOA Section 159(d)(1)(L), (numbered as indicators 7, 8, 22, 23, 28, 29, and 30 respectively in the Annual Report).
 - Section VII presents the results by CTS provider for seven indicators (D, E, H, J, and K(i)) described in WIOA Section 159(d)(1), (numbered as indicators 16, 17, 20, 21, 24, 25, and 26 respectively in the Annual Report).

WIOA Section 159(d)(1)(O) allows for the inclusion of additional measures in the Job Corps Annual Report as required by the Secretary of Labor; at this time no additional metrics have been required by the Secretary.

JOB CORPS PY 2019 ANNUAL PERFORMANCE REPORT

UNDER THE WORKFORCE AND INNOVATION OPPORTUNITY ACT (WIOA)

The Workforce Innovation and Opportunity Act (WIOA), Section 159(c)(4) requires Job Corps to develop an Annual Report presenting performance results on the six primary indicators of performance¹ common to all WIOA programs and an additional 26 measures noted in WIOA, Section 159(c) and 159(d).

Below we provide a summary of the national results of all 32 metrics for the Program Year (PY) 2019 Annual Report and compare these to the results in the PY 2017 and PY 2018 Annual Reports. Results for each indicator by center, Career Transition Service (CTS) provider, and/or Outreach and Admissions (OA) provider, as appropriate, are provided in detailed tables in Appendix A. Additionally, as shown in Section I of Appendix A, the data presented across these indicators calculate program performance primarily based on data that are reported/captured during PY 2019 and, as such, represent several different student cohorts (e.g., enrollee cohorts, exit cohorts, participants served cohorts, surveyed cohorts, placed graduate cohorts), and not just the cohort of exiters and participants served in PY 2019. These results therefore do not allow for conclusions for a given cohort of program participants but capture what was happening in Job Corps in PY 2019, which can then be compared to previous years' outcomes. To provide context for these comparisons, first we present a summary of the factors that uniquely impacted PY 2019 outcomes as compared to the previous year, followed by the national results for all 32 metrics.

¹ WIOA, Section 116(b)(2)(A)(ii)

FACTORS AFFECTING PY 2019 PERFORMANCE RESULTS

For PY 2019 there are two main issues that impact Job Corps performance outcomes as summarized below. These factors relate to the implementation of definitional changes in PY 2018 that affect the primary six measures, and the impact of the global pandemic resulting from Coronavirus 19 (COVID-19).

Job Corps adjusted its specifications for the primary six measures in PY 2018 to incorporate changes in definitions to meet WIOA requirements and align with how other programs report results. The changes to the indicators that began in PY 2018 include: (1) revised definitions of the Quarter 2 and Quarter 4 reporting periods for indicators 1, 2, 3, 4, and 6 from being based on a student's exit date to a student's exit calendar quarter; and, (2) an expanded definition of who constitutes a "participant" for reporting on indicators 1 through 6 from students who were enrolled for 60 or more days to those who completed Job Corps' Career Preparation Period (CPP) or were enrolled for 60 or more days. The broadened definition of participants essentially adds to the measure pools those students who completed CPP but were enrolled in Job Corps for less than 60 days. As skills gains or credential attainments generally require longer lengths of stay in Job Corps, the addition of this group to measure pools lowers performance results.

As with PY 2018, the impact of these definitional changes has been disproportionate across the primary six measures for PY 2019. Since the expanded definition was applied to all students active on July 1, 2018 and all enrollments thereafter, it has predominantly impacted the pools of indicator 5 for PY 2019 (which are based upon all participants served in PY 2019), has moderately affected the pools of indicators 1 and 3 (which are based upon participants who completed a Quarter 2 survey in PY 2019) and has minimally affected the pools of indicators 2, 4 and 6 (which are based upon participants who completed a Quarter 4 survey in PY 2019). As such, a comparison of PY 2019 results for the primary six measures with earlier periods should be interpreted cautiously.

In addition, beginning in March 2020 the COVID-19 pandemic seriously impacted Job Corps' typical program operations, resulting in unprecedented challenges for the Job Corps program during the final 3.5 months of PY 2019. From March 16, 2020 to May 10, 2020, Job Corps implemented a Spring Break to protect students from COVID-19 infection. During this period, even though students were still enrolled in the program, Job Corps could not provide traditional academic or career technical training services and no testing could occur, resulting in limited student accomplishments. Additionally, to mitigate risk, Outreach and Admissions (OA) operations were halted, and no new students were able to enter the program after March 16, 2020 through to the end of the program year (and beyond). On May 11, 2020, Job Corps was able to resume some program operations by pivoting to a distance-learning model. There were, however, inherent challenges to managing and accounting for student accomplishments under this new model. Among those challenges were: some students being initially unable to participate in distance learning because of equipment deficits; the necessary use of multiple learning platforms from operators to provide training content to students; the need to quickly modify "hands-on" training techniques and materials for delivery under a distance learning format; and accurately accounting for student achievements when some were participating using correspondence packets, while others were using technology. Additionally, concurrent with the temporary suspension of enrollments of new students into the program, the larger economic impacts of COVID-19 significantly affected the program's ability to provide placement and career transition services to students who were

exiting the program. Many CTS offices were themselves temporarily closed because of local mandates, students could not be scheduled for interviews with prospective employers, many possible employers were closed for business during this period, significantly diminishing employment possibilities nationwide. Job Corps' post-placement survey operations in Houston, Texas were also affected, with operations temporarily halted between March 25th and May 31st because of local ordinances. These factors collectively have impacted PY 2019 outcomes, and should be considered when assessing PY 2019 performance and comparing with prior years' results.

PY 2019 NATIONAL PERFORMANCE SUMMARY

PRIMARY SIX MEASURES (INDICATORS 1–6)

Approximately three-quarters (74.8%) of Job Corps participants who responded to the WIOA Quarter 2 survey in PY 2019 were employed or in an education or training program in their second quarter after exit, slightly lower than the PY 2017 and PY 2018 results of 77.8 percent and 76.5 percent, respectively. Of the participants who responded to the WIOA Quarter 4 survey in PY 2019, 70.6 percent reported they were employed or in an education or training program in their fourth quarter after exit – a small decline from the PY 2017 and PY 2018 results of 71.7 percent and 72.0 percent, respectively.

Of those who were employed in the second quarter after exit and reported their wages, the median Quarter 2 earnings were \$4,763 in PY 2019, an increase from both the PY 2017 and PY 2018 median quarterly earnings of \$4,191 and \$4,629 respectively. Just under three-fifths (58.2%) of Quarter 4 survey respondents who were employed in the second quarter after exit reported they were employed by the same employer in the fourth quarter after exit. This represents a slight decrease from both PY 2017 (59.4%) and PY 2018 (62.3%) results.

Job Corps' credential attainment rate (among participants who complete the Quarter 4 surveys) was 85.8 percent, slightly higher than the PY 2017 and PY 2018 results of 85.3 percent and 84.9 percent, respectively.

Job Corps' measurable skill gains rate among all participants served in PY 2019, however, decreased by 37.8 percentage points from PY 2017 and 31.4 percentage points from PY 2018, to 48.5 percent. The decline from PY 2017 to PY 2018 was primarily due to the change in the composition of the pool, which beginning in PY 2018 included those students who completed CPP but were enrolled for less than 60 days. If the participant definition had not changed, PY 2018 performance would instead have decreased by only 2.1 percentage points. The larger decline in performance in PY 2019 is due to a variety of factors, including: the implementation of Spring Break for almost 8 weeks where participants could not attain accomplishments; the transition to distance learning which limited the types of attainments that could be achieved; the suspension of new enrollments for the last 3.5 months of the program year many of whom may have achieved some gains; and programmatic changes implemented in PY 2019 leading to an increase in the difficulty of attaining skills in several areas (such as the transition to the more challenging TABE 11/12 from the TABE 9/10 and a more rigorous definition of what constitutes a primary industry-recognized credential).

Measure #	Measure Description	PY 2017	PY 2018	PY 2019
1	2nd Quarter Placement Rate	77.8%	76.5%	74.8%
2	4th Quarter Placement Rate	71.7%	72.0%	70.6%
3	Median 2nd Quarter Earnings	\$4,191	\$4,629	\$4,763
4	Credential Attainment Rate	85.3%	84.9%	85.8%
5	Measurable Skill Gains Rate	86.3%	79.9%	48.5%
6	Employer Retention Rate	59.4%	62.3%	58.2%

Table 1. Results for Primary Indicators of Performance, PY 2017, PY 2018, and PY 2019

ENROLLEES RECRUITED AND 90-DAY COMMITMENTS (INDICATORS 7–8)

A total of 32,530 enrollees entered Job Corps during PY 2019, a 25 percent decline from PY 2017 and a 31 percent decline from PY 2018. As noted previously, no new students enrolled in Job Corps from March 16, 2020 through the remainder of the program year, leading to this decrease in total enrollees for PY 2019.

A higher proportion of these students, however, remained enrolled in Job Corps for 90 or more days in PY 2019 (96.1%) as compared to PY 2018 (70.2%) and PY 2017 (74.7%). This is likely due to the implementation of Spring Break between March 16 and May 10, 2020 to protect students from COVID, followed by a distance-learning approach where students continued their educational and career training off-site. During this period very few students exited the program.

DEMOGRAPHICS OF ENROLLEES SERVED (INDICATORS 9–14)

A total of 61,410 enrollees were served in PY 2019. This includes all enrollees who entered Job Corps during PY 2019 plus those who were active at the beginning of the program year (i.e., students who had not separated prior to July 1, 2019, regardless of when they enrolled). This represents a decrease from PY 2017 and PY 2018 during which 71,863 and 74,050 enrollees, respectively, were served. As noted previously, no new students enrolled in Job Corps from March 16, 2020, through the remainder of the program year, leading to this decrease in enrollees served for PY 2019.

Per WIOA, Section 144 (a)(1), age at enrollment is an eligibility criterion for entry into Job Corps, with the age range limited to 16-to-24-year-olds. WIOA does allow the maximum age limit of 24 years at program entry to be waived in the case of an individual with a disability. Results were similar for PY 2018 and PY 2019. That is, more than one-quarter of the PY 2018 and PY 2019 enrollees served were ages 16–17 on the date of enrollment (27.4% and 27.2%, respectively), while over half were between 18 and 21 years old (58.2% and 58.5%, respectively). Less than one-sixth of PY 2018 enrollees (14.2%) and PY 2019 enrollees (14.0%) served were between the ages of 22 and 24; only 0.2 percent for PY 2018 and 0.3 percent for PY 2019 were 25 or older at enrollment. These results represent a slight increase in the proportion of 16-17-year-old enrollees served in PY 2018 and PY 2019 as compared to PY 2017 (26.3%), and a corresponding decrease in the proportion of 22-24-year-olds as compared to PY 2017 (15.3%).

Similar to results for PY 2017 and PY 2018, the largest racial/ethnic group of enrollees served in PY 2019 was African American (45.3%), followed by White (24.3%) and Hispanic/Latino (21.6%). Just under four percent (3.9%) of enrollees served self-identified as more than one race, while 4.8 percent identified themselves solely as American Indian/Alaskan Native, Asian, or Native Hawaiian/Pacific Islander. Overall, the distribution of enrollees served in PY 2019 is comparable to the PY 2017 and PY 2018 results for most racial/ethnic groups, although there is a slight increase in the proportion of Hispanic/Latino enrollees served in PY 2019 as compared to PY 2017 and PY 2018 (increases of 1.7 and 0.9 percentage points, respectively) and 1.8 and 0.5 percentage point decreases in the proportion that were African-American compared to results for PY 2017 and PY 2018, respectively.

Over three-fifths (64.3%) of enrollees served were male in PY 2019, similar to the 64.1 percent in PY 2018 and 63.4 percent in PY 2017. Additionally, 56.9 percent in PY 2019 had no high school diploma or equivalency (HSD/HSE) at program entry, a decline of 2.5 percentage points from PY 2018 and 3.7 percentage points from PY 2017. Only a very small number of enrollees served (12) had completed some higher education prior to enrollment in Job Corps in PY 2018, similar to PY 2018 (21) and PY 2017 (26).

A second eligibility criterion for entry into Job Corps under WIOA, Section 144 (a)(2) is the requirement to be a low-income individual. This criterion may be waived (as noted in Section 144(b)) under the Special Rule for Veterans. As in PY 2017 and PY 2018, almost all enrollees (99.8%) were low-income individuals in PY 2019.

Measure #	Measure Description		PY 2017	PY 2018	PY 2019
9	Number of Enrollees Served		71,863	74,050	61,410
	Number of Enrollees Served By:				
10	Age	16	8,385	9,277	7,851
		17	10,523	11,022	8,876
		18	14,314	15,087	12,689
		19	12,210	12,615	10,640
		20	8,851	8,968	7,294
		21	6,438	6,395	5,280
		22	4,764	4,602	3,740
		23	3,627	3,451	2,796
		24	2,596	2,452	2,080
		25+	155	181	164
11	Race/Ethnicity	Hispanic/Latino	14,330	15,347	13,279
		American Indian or Alaskan Native	2,097	2,008	1,641
		Asian	995	898	741
		Black/African-American	33,875	33,926	27,837
		Native Hawaiian/Pacific Islander	612	675	539
		White	17,127	18,255	14,948
		More Than One Race	2,827	2,971	2,425
12	Gender	Male	45,529	47,499	39,505
		Female	26,334	26,551	21,905
13	Education Level	No HSD/HSE at Entry	43,558	43,974	34,970
		HSD/HSE at Entry	28,279	30,055	26,428
		Some Post-secondary	26	21	12
14	Income Level	Low Income Individual	71,738	73,899	61,270

Table 2. Demographics of Enrollees Served, PY 2017, PY 2018, and PY 2019

STATUS OF SEPARATED STUDENTS (INDICATORS 15, 22–23)

Job Corps defines graduates as students who have been enrolled for 60 or more days, completed Career Technical Training (CTT) and/or attained an HSD/HSE, and have not separated due to a violation of the Zero Tolerance (ZT) policy. The count of graduates includes all students who separated in PY 2019, regardless of when they enrolled, who met the graduate definition. A total 14,878 students graduated from Job Corps in PY 2019, representing 45.2 percent of all students who separated during the program year, a decline from 49.1 percent in PY 2018 and 55.4 percent in PY 2017. This decline may in part be due to the implementation of Spring Break followed by the transition to distance learning, whereby students who may otherwise have completed their training and graduated by the end of the program year were delayed due to these COVID safety measures.

The remaining 18,064 students (54.8%) separated as former enrollees (students who remained in Job Corps at least 60 days but did not graduate) or ZT separations (students who separated due to violations of Job Corps' ZT policy) in PY 2019. The proportion of separated students that were former enrollees and ZT separations increased both in PY 2018 and PY 2019 as compared to PY 2017. The increase in PY 2018 was in part due to the enrollment surge beginning in July 2018 that led to a greater number and percentage of separated students staying less than 60 days, who generally do not attain credentials prior to separation. The proportion was higher in PY 2019 primarily due to the impacts of the COVID-safety measures that led to very few students separating in the last few months of the program year, and many students who would otherwise have successfully completed Job Corps remaining enrolled in the program. As there is a seasonal trend in graduations (typically more students separate as graduates near the end of the program year), the COVID-safety actions led to an increase in the proportion of separated students who were non-graduates.

Figure 1. Percent of Students by Status at Separation, PY 2017, PY 2018, and PY 2019

GRADUATE ACADEMIC ATTAINMENTS (INDICATORS 18–19)

Of the graduates who separated from Job Corps in PY 2019, 47.0 percent attained an academic credential while in Job Corps; 4,634 completed a high school diploma, while 2,359 attained a high school equivalency. This represents a decline of eight percentage points from the proportion of graduates who attained an academic credential in PY 2018 (55.0%) and 9.2 percentage points from the proportion of graduates who attained an academic credential in PY 2017 (56.2%) due to a decrease in high school diploma attainment (31.1% of graduates completed a high school diploma in PY 2019 as compared to 40.6 % in PY 2018 and 42.4% in PY 2017). As described in the previous section, the COVID-related safety measures implemented by Job Corps beginning March 16, 2020 led to a decline in the number of students that would otherwise have exited the program, particularly those who would have separated as graduates and have attained a credential.

PLACED GRADUATE OUTCOMES (INDICATORS 16–17, 20–21, 24–27)

Job Corps graduates receive career transition services for a period of 12 months and may enter more than one placement during this period. In PY 2019, 8,165 graduates entered a job that was related to the training they completed at Job Corps (i.e., job-training match [JTM]), while 6,950 entered a non-JTM job (this includes students who did not complete training at Job Corps and cannot therefore enter a job that is a JTM). In PY 2019 1,068 graduates entered a postsecondary education program, 639 entered the Armed Forces, and 641 entered a Registered Apprenticeship Program. These placement categories are not mutually exclusive, and a graduate who entered more than one type of placement in PY 2019 is represented more than once across these groups. The distribution of graduate placements across these categories in PY 2019 was very similar to PY 2018 and PY 2017, varying by less than one percentage point.

For the graduates who entered a job or the military during PY 2019, their average wage was \$12.73, an increase from the PY 2018 and PY 2017 average wages of \$11.97 and \$11.61, respectively. Of those employed at 6 months after the initial placement (based on the calculated proxy measure described in Appendix A, Section I), their average wage was \$14.84, as compared to the PY 2018 result of \$13.67 and PY 2017 result of \$12.98.

PROXIMITY OF ENROLLEE PRIMARY ADDRESS TO CENTER LOCATION (INDICATORS 28–30)

Job Corps tries to match students to centers within their home state that offer the type of career technical training in which they are interested. In PY 2019, over three-quarters of all enrollees (77.9%) enrolled at a center within the same state; a total of 93.9 percent of students enrolled in a center within the same Region (that includes within the same state) in which they were living prior to entry in Job Corps. Only 6.1 percent of students enrolled at a center located outside their Region. These results are very similar not only those of PY 2018, where 78.2 percent of enrollees entered a center within the same state, 94.7 percent entered a center within the same Region, and 5.3 percent entered a center outside their Region, but also those of PY 2017 (77.7%, 94.8%, and 5.3%, respectively).

Figure 2. Enrolled Students' Proximity to Center Location, PY 2019

COSTS (INDICATORS 31–32)

Job Corps' cost per enrollee, which is calculated as the ratio of the total budget to the number of new enrollments during PY 2019 (n=32,530), is \$44,001 as compared to the PY 2018 cost per enrollee of \$31,832 and the PY 2017 cost per enrollee of \$34,301. The cost per graduate, calculated as the ratio of the total budget to the number of graduates (n=14,878), is \$96,207 as compared to the PY 2018 cost per graduate of \$67,493 and the PY 2017 cost per graduate of \$57,312. The total budget at the national level is calculated by summing center-level costs, regional expenses, and national expenses, and includes all construction, rehabilitation, and acquisition (CRA) expenses incurred during PY 2019². At the center level, a center's total budget is calculated by summing the center's expenses with the proportion of regional and national expenses allocated based upon the number of new enrollments at the center in PY 2019. As with the national total budget, center-level budgets include CRA expenses. The count of enrollees includes all new enrollments in PY 2019 and excludes those who were at the center during the program year but who enrolled prior to PY 2019. The count of graduates includes those who separated in PY 2019, regardless of when they enrolled, and met the criteria to be a graduate.

The increased costs for PY 2019 partially reflect the impacts of the COVID safety measures whereby no new students enrolled during the last 3.5 months of the program year and few students exited during that period. Overall, total budget for PY 2019 increased by 3 percent as compared to PY 2018, while total new enrollees decreased by 31 percent and total graduates decreased by 33 percent. Compared to PY 2017, the PY 2019 total budget decreased by 3 percent, while the total new enrollees decreased by 25 percent and total graduates decreased by 42 percent. These large declines in total enrollees and total graduates, which respectively form the denominators for indicators 31 and 32, significantly impact the results for PY 2019.

² Total CRA expenses incurred in PY 2019 was \$26.1 million.

DATA SOURCES AND LIMITATIONS

Data to report WIOA performance metrics for the PY 2017, PY 2018, and PY 2019 Annual Reports are derived from three sources. Indicators 1, 2, 3, 6, and 27 are calculated using information only from participants who completed the Q2 or Q4 WIOA surveys (as appropriate); indicators 5, 7 through 26, 28, 29, and 30 are calculated using programmatic data collected as part of Job Corps' routine data collection and reporting activities; indicator 4 is calculated through a combination of WIOA survey data and Job Corps programmatic data; and indicators 31 and 32 are based upon a combination of programmatic data and financial information as calculated by the Department of Labor (DOL) Office of the Chief Evaluation Officer.

With indicator 27, the Department is to report the average wage of graduates who enter unsubsidized employment on the day that is 6 months after the first day of such employment. Prior to PY 2016, Job Corps administered surveys to collect such data from initially placed graduates. However, with the WIOA requirement to report results at Quarter 2 and Quarter 4 after separation for all program participants, Job Corps revised its post-separation surveys to reflect the new requirements and discontinued the 6-month placed graduate survey. Because the new survey timeframes are not designed to overlap with the period 6 months after initial placement, Job Corps no longer has an established method for directly measuring this outcome. As described in Appendix A, Section I, to be responsive to the requirement to report on indicator 27, Job Corps developed a proxy measure of the hourly wage at approximately 6 months after initial placement based on Q2 and Q4 survey data for students whose reference quarter overlapped a period 5 to 7 months after the date of initial placement.

As allowed in WIOA, Section 159(d)(2), Rules for Reporting of Data, the Job Corps program does not present the result when the total number of individuals to be included in the calculation of a rate, percent, earnings, or wages for an indicator is below 50 as we deem this count to be insufficient to yield statistically reliable information. Furthermore, the Job Corps program does not present counts when the number of individuals to be reported for a given indicator is below five, due to concerns with revealing personally identifiable information about an individual. Notations have been used in the tables in Appendix A to mark these concerns.

ESTABLISHING EXPECTED LEVELS OF PERFORMANCE

WIOA requires that the Department of Labor establish expected levels of performance for certain Job Corps indicators and compare its outcomes against these targets. Job Corps is required to establish expected levels of performance for the following service providers and metrics:

NATIONALLY:

- Expected levels of performance for the primary six measures (indicators 1 through 6)

BY CENTER:

- Expected levels of performance for the primary six measures (indicators 1 through 6)
- Expected levels of performance for enrollees within state, within Region, and within surrounding Region (indicators 28 through 30)

BY OA PROVIDER:

- Expected levels of performance for number of enrollees recruited and number who remained 90 or more days (indicators 7 and 8)
- Expected levels of performance for number and percent of former enrollees and Level 1 ZTs (indicators 22 and 23)
- Expected levels of performance for enrollees within state, within Region and within surrounding Region (indicators 28 through 30)

BY CTS PROVIDER:

- Expected levels of performance for the primary six measures (indicators 1 through 6)
- Expected levels of performance for the number of graduates who enter the Armed Forces and the number who enter apprenticeship programs (indicators 16 and 17)
- Expected levels of performance for the number of graduates who enter unsubsidized jobs related to their career and technical education and training and the number who enter unsubsidized jobs not related to their education and training (indicators 20 and 21)
- Expected levels of performance for the percent and number of graduates who enter postsecondary education (indicators 24 and 25)
- Expected levels of performance for the average wage of graduates who enter unsubsidized jobs on the first day of such employment and at 6 months after the first day (indicators 26 and 27)

As noted in the PY 2017 and PY 2018 Annual Reports, expected levels of performance are not anticipated to be set until adequate baseline data are available to determine appropriate targets. In order to establish reasonable goals, the specifications used for calculating the indicators must remain relatively stable over time so that changes in performance outcomes are not a result of changes in how the indicators are measured. As discussed earlier in this Annual Report, Job Corps has adjusted its specifications for the primary six measures in PY 2018 to incorporate changes in definitions to meet WIOA requirements and align with how other programs will report results. This includes an expanded definition of who constitutes a “participant” for reporting on indicators 1 through 6 and revised definitions of the Quarter 2 and Quarter 4 reporting periods for indicators 1, 2, 3, 4, and 6. Collectively, these changes have impacted the outcomes of these primary performance indicators (as well as affect the pool base for indicator 27 that relies on WIOA survey results).

Additionally, Job Corps anticipates that aggregate Unemployment Insurance (UI) Wage Record matches will be available for PY 2020 through a data exchange between the State Wage Interchange System (SWIS) and the Workforce Integrated Performance System (WIPS). The use of UI Wage Record matches will expand the pools for indicators 1, 2, 3, 4, and 6 from students who meet the pool criteria and complete the relevant WIOA survey to all students who meet the pool criteria. Performance levels on these indicators are expected to significantly change compared to earlier Annual Report results due to these definitional shifts and the availability of new data matches.

Furthermore, the impacts of COVID-19 are anticipated to continue to affect program performance in PY 2020. In Fall 2020, Job Corps released a policy³ requiring centers to develop and implement a comprehensive plan for resuming in-person operations that must address the requirements detailed in an accompanying 25-page checklist. The checklist includes, among other items, the requirement to adhere to current CDC protocols. Centers with approved plans and where other factors are also met (e.g., verification of center readiness and implementation of plan, availability of COVID testing supplies, state/local hospital admission, infection and death rates) are subsequently allowed to return students in staggered cohorts. This gradual resumption of in-person operations allows for a controlled environment for COVID-19 testing, quarantining and, when necessary, isolating students, to ensure student and staff safety. The capacity of each center is, however, limited to the number of students that can be on center while accounting for the space needed to meet health and safety protocols (such as space for COVID-19 testing, physical distancing, and quarantining/isolation).

Residential centers received approval for returning students at different timeframes depending on when all requirements were met, ranging from late Fall 2020 through late Spring 2021. Non-residential centers, however, were not able to return students throughout PY 2020 due to the higher risk posed for COVID-19 infections and outbreaks by having students on and off campus daily. Similarly, non-residential students at residential centers could not return to center during PY 2020. Additionally, even centers that resumed in-person operations could be required to pause their return of students if the risk profile for the center changes.

In April 2021, Job Corps released Program Instruction Notice 20-20, informing centers of a new virtual enrollment process, allowing new students to enroll and complete their first 60-70 days in the program via distance learning, before arriving on center. Again, centers with approved virtual enrollment plans and the anticipated physical capacity to arrive these students to center after their virtual period is completed could begin enrolling new students virtually, and arriving students on center, at a faster and earlier pace.

³ Program Instruction Notice 20-08, dated September 25, 2020.

The necessary phased in approach for resumption of center in-person operations and the timing of when new students can enroll leads to a differential between performance outcomes at centers that have commenced such operations as compared to those that have not yet done so, or who are on a more delayed schedule. Also, the varying timeframes for when centers resume such operations also impact outcomes such that performance will begin improving at these centers earlier than those who do so much later. These circumstances create artificial advantages for some centers and are not reflective of performance differences.

As a consequence of all these factors, Job Corps will examine the PY 2022 performance results and determine if it can serve as baseline data to establish realistic targets and expected levels of performance for PY 2023.

FUTURE REPORTS

As described above, the Job Corps WIOA Annual Report for PY 2019 uses the same definitions and specifications as presented for all indicators in the PY 2018 Annual Report. For the PY 2020 Annual Report Job Corps anticipates that aggregated UI Wage record matches will be available, impacting the pools for indicators 1, 2, 3, 4 and 6. The pools for these measures will expand from students who meet the pool criteria and complete the relevant WIOA survey, to all students who meet the pool criteria. Furthermore, Job Corps anticipates that the impacts of COVID safety-related measures implemented by the program will continue into PY 2020, affecting performance results and creating inequities in comparing performance across providers based upon their operating status. Job Corps therefore anticipates that the earliest it can establish expected levels of performance for relevant indicators will be PY 2022, if sufficient baseline data are available to determine appropriate targets.

APPENDIX A

SEPTEMBER 20, 2021

Job Corps Annual WIOA Report for PY 2019
Summary of Report Indicators

#	WIOA Citation	WIOA Language	Specific Indicators	Definition	Requires Goals/Targets or Expected Level of Performance be Established?	Report Results:	Specification Details ¹
1	Section 116(b)(2)(A)(ii)	(I) the percentage of program participants who are in education or training activities, or in unsubsidized employment, during the second quarter after exit from the program	2nd Quarter Placement Rate	$\frac{\text{Number employed or in education/training during the second quarter after exit}}{\text{Number of participants who exited}}$	Required by center and CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	1) For PY 2019, the denominator is based upon the participants who completed the survey during the program year. 2) For calculating this measure by CTS provider, the pool is restricted to participants who are graduates and former enrollees and are therefore assigned to a CTS provider. National CTS provider results therefore differ from National Center results in that they include only graduates and former enrollees who completed a Q2 survey during the program year.
2	Section 116(b)(2)(A)(ii)	(II) the percentage of program participants who are in education or training activities, or in unsubsidized employment, during the fourth quarter after exit from the program	4th Quarter Placement Rate	$\frac{\text{Number employed or in education/training during the fourth quarter after exit}}{\text{Number of participants who exited}}$	Required by center and CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	1) For PY 2019, the denominator is based upon the participants who completed the survey during the program year. 2) For calculating this measure by CTS provider, the pool is restricted to participants who are graduates and former enrollees and are therefore assigned to a CTS provider. National CTS provider results therefore differ from National Center results in that they include only graduates and former enrollees who completed a Q4 survey during the program year.
3	Section 116(b)(2)(A)(ii)	(III) the median earnings of program participants who are in unsubsidized employment during the second quarter after exit from the program	Median 2nd Quarter Earnings	Median earnings in the second quarter after exit is the midpoint value of quarterly total earnings between the highest and lowest amounts earned among participants who exited and who were employed in the second quarter after exit.	Required by center and CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	1) For PY 2019, the measure is based upon the participants who completed the Q2 survey during the program year and reported earnings. 2) For calculating this measure by CTS provider, the pool is restricted to participants who are graduates and former enrollees and are therefore assigned to a CTS provider. National CTS provider results therefore differ from National Center results in that they include only graduates and former enrollees who completed a Q2 survey during the program year.

Job Corps Annual WIOA Report for PY 2019
Summary of Report Indicators

#	WIOA Citation	WIOA Language	Specific Indicators	Definition	Requires Goals/Targets or Expected Level of Performance be Established?	Report Results:	Specification Details ¹
4	Section 116(b)(2)(A)(ii)	(IV) the percentage of program participants who obtain a recognized postsecondary credential, or a secondary school diploma or its recognized equivalent (subject to clause (iii)), during participation in or within 1 year after exit from the program	Credential Attainment Rate	<p>Number without an HSD/HSE at entry who were in a secondary education program (≥ 9th grade) while in Job Corps and obtained an HSD/HSE during the program or within one year after exit AND who were also employed or enrolled in an education/training program leading to a postsecondary credential within one year after exit PLUS the number with an HSD/HSE at entry, who were in a postsecondary education/ training program while in Job Corps and obtained a postsecondary credential (i.e., completed CTT, completed AT, completed ACT or obtained a primary training-related IRC) during the program or within one year after exit.</p> <p>Number of participants without an HSD/HSE at entry who exited and were in a secondary education program while in Job Corps PLUS the number of participants with an HSD/HSE at entry who exited and were in a postsecondary education/ training program while in Job Corps</p>	Required by center and CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	<p>1) For PY 2019, the denominator is based upon the participants who completed the survey during the program year.</p> <p>2) For calculating this measure by CTS provider, the pool is restricted to participants who are graduates and former enrollees and are therefore assigned to a CTS provider. National CTS provider results therefore differ from National Center results in that they include only graduates and former enrollees who completed a survey during the program year.</p>
5	Section 116(b)(2)(A)(ii)	(V) the percentage of program participants who, during a program year, are in an education or training program that leads to a recognized postsecondary credential or employment and who are achieving measurable skill gains toward such a credential or employment	Measurable Skills Gains Rate	<p>Number of participants served during the program year who obtained one (or more) of the following: at least 1 EFL gain, an HSD/HSE, a CTT, an AT, a primary IRC, at least 12 credits in an ACT or an approved industry foundations</p> <p>Number of participants served during the program year</p>	Required by center and CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	<p>1) EFL gains are calculated based upon the initial TABE score compared to the last TABE score reported in PY 2019 that is also within the first year of enrollment.</p> <p>2) Currently, data are not available to include the last two credits listed; they are included as placeholders for when relevant data are consistently recorded, and associated credits will be included in the numerator at that time.</p> <p>3) For calculating this measure by CTS provider, the pools is restricted to separated graduates and former enrollees since CTS providers are assigned upon exit from Job Corps. National CTS provider results therefore differ from National Center results in that they include only graduates and former enrollees served during the program year.</p>
6	Section 116(b)(2)(A)(ii)	(VI) the indicators of effectiveness in serving employers established pursuant to clause (iv)	Employer Retention Rate	<p>Number of participants who were employed by the same employer in the second and fourth quarters after exit</p> <p>Number of participants who completed a Q4 survey and were employed in the second quarter after exit</p>	Required by center and CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	<p>1) For PY 2019, the denominator is based upon those who completed a Q4 survey in PY 2019 and who were employed in Q2 (either reported through the Q2 survey or through specific questions asked in the Q4 survey about Q2 employment).</p> <p>2) For calculating this measure by CTS provider, the pool is restricted to participants who are graduates and former enrollees and are therefore assigned to a CTS provider. National CTS provider results therefore differ from National Center results in that they include only graduates and former enrollees who completed a Q4 survey during the program year and reported being employed in Q2.</p>

Job Corps Annual WIOA Report for PY 2019
Summary of Report Indicators

#	WIOA Citation	WIOA Language	Specific Indicators	Definition	Requires Goals/Targets or Expected Level of Performance be Established?	Report Results:	Specification Details ¹
7	Section 159(c)(2)	(A) the number of enrollees recruited, compared to the established goals for such recruitment, and the number of enrollees who remain committed to the program for 90 days after enrollment	Number of enrollees recruited	Number of recruited individuals that enroll in Job Corps during the reporting period	Required -- Established	By OA provider	Enrollees recruited refers to new arrivals
8			Number of 90-Day Commitment	Number of enrollees that remain in Job Corps for 90 or more calendar days	Required, Not Yet Established	By OA provider	Enrollees who had the opportunity to remain erolled for 90 days in PY 2019.
9	Section 159(d)(1)	(A) the number of enrollees served; Note: Sec 142. Definitions. (3) ENROLLEE.—The term “enrollee” means an individual who has voluntarily applied for, been selected for, and enrolled in the Job Corps program, and remains with the program, but has not yet become a graduate.	Number Enrollees Served	Number of students active during the reporting period (i.e., participants served)	No	Nationally, by Center	Enrollees served refers to number of students active in the reporting period (i.e., all students active at the beginning of the PY plus all new arrivals during the PY).
10	Section 159(d)(1)	(B) demographic information on the enrollees served, including age, race, gender, and education and income level;	Enrollees Served Demographics: Age	Number of participants served in the reporting period by age	No	Nationally, by Center	Enrollees served refers to number of students active in the reporting period.
11			Enrollees Served Demographics: Race	Number of participants served in the reporting period by race	No	Nationally, by Center	1) Enrollees served refers to number of students active in the reporting period. 2) Use QPR breakout of race and ethnicity.
12			Enrollees Served Demographics: Gender	Number of participants served in the reporting period by gender	No	Nationally, by Center	Enrollees served refers to number of students active in the reporting period.
13			Enrollees Served Demographics: Education Level	Number of participants served in the reporting period by education level	No	Nationally, by Center	1) Enrollees served refers to number of students active in the reporting period. 2) Use QPR breakout of education levels.
14			Enrollees Served Demographics: Income Level	Number of participants served in the reporting period by income level	No	Nationally, by Center	1) Enrollees served refers to number of students active in the reporting period. 2) Use QPR category of low-income individual.
15	Section 159(d)(1)	(C) the number of graduates of a Job Corps center;	Number of Graduates	Number of graduates who exited in the reporting period by center	No	Nationally, by Center	
16	Section 159(d)(1)	(D) the number of graduates who entered the Armed Forces;	Number of Graduates Placed in Armed Forces	Number of graduates who entered the Armed Forces with a date reported in the reporting period	Required by CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	This includes all graduates reported as having entered the Armed Forces at any point during their placement window.
17	Section 159(d)(1)	(E) the number of graduates who entered apprenticeship programs;	Number of Graduates Entered Apprenticeship	Number of graduates who entered an apprenticeship program with a date reported in the reporting period	Required by CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	This includes all graduates reported as having entered an apprenticeship program at any point during their placement window.
18	Section 159(d)(1)	(F) the number of graduates who received a regular secondary school diploma;	Number of Graduates Received HSD	Number of graduates who received a regular secondary school diploma while at Job Corps and exited during the reporting period	No	Nationally, by Center	HSEs promoted to HSDs will count as HSDs
19	Section 159(d)(1)	(G) the number of graduates who received a State recognized equivalent of a secondary school diploma;	Number of Graduates Received HSE	Number of graduates who received a State recognized equivalent of a secondary school diploma while at Job Corps and exited during the reporting period	No	Nationally, by Center	HSEs promoted to HSDs will count as HSDs

Job Corps Annual WIOA Report for PY 2019
Summary of Report Indicators

#	WIOA Citation	WIOA Language	Specific Indicators	Definition	Requires Goals/Targets or Expected Level of Performance be Established?	Report Results:	Specification Details ¹
20	Section 159(d)(1)	(H) the number of graduates who entered unsubsidized employment related to the career and technical education and training received through the Job Corps program and the number who entered unsubsidized employment not related to the education and training received;	Number of Placed Graduates with a JTM	Number of graduates with a date reported in the reporting period who entered unsubsidized employment related to the career and technical education and training received through the Job Corps program	Required by CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	1) JTM placements are counted for graduates who completed CTT and are reported as having entered a placement that is a JTM at any point during their placement window. 2) JTM's exclude post-secondary education and training placements and military placements. 3) Placements that are not JTM's are counted for graduates whose reported job placements at any point during their placement window are not job-training matches. This includes graduates who are not CTT completers and by default cannot enter a JTM placement.
21			Number of Placed Graduates without a JTM	The number of graduates with a date reported in the reporting period who entered unsubsidized employment not related to the education and training received through the Job Corps program	Required by CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	
22	Section 159(d)(1)	(I) the percentage and number of former enrollees, including the number dismissed under the zero tolerance policy described in section 152(b);	Number of Former Enrollees/Level 1 ZTs	Number of former enrollees and Level 1 Zero Tolerance (ZT) separations who exit in the reporting period	Required by OA provider, Not Yet Established	Nationally, by Center, by OA provider	
23			Percentage of Former Enrollees/Level 1 ZTs	Number of former enrollees and Level 1 Zero Tolerance separations who exit in the reporting period $\frac{\text{Number of exiters in the reporting period}}{\text{Number of former enrollees and Level 1 Zero Tolerance separations who exit in the reporting period}}$	Required by OA provider, Not Yet Established	Nationally, by Center, by OA provider	
24	Section 159(d)(1) (referenced in Section 159(c)(2)(B))	(J) the percentage and number of graduates who enter postsecondary education;	Percent of Graduates Entered Postsecondary Education	Number of graduates with a date reported in the reporting period that entered postsecondary education $\frac{\text{Number of Job Corps graduates whose initial placement records are due or received in the reporting period}}{\text{Number of graduates with a date reported in the reporting period that entered postsecondary education}}$	Required by CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	Postsecondary education is classified as placements coded: (06) Part-time Combo, (07) Full-time Combo, (09) Post-secondary Training, and, (10) College; excludes code (12) Other.
25			Number of Graduates Entered Postsecondary Education	Number of graduates with a date reported in the reporting period that entered postsecondary education	Required by CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	Postsecondary education is classified as placements coded: (06) Part-time Combo, (07) Full-time Combo, (09) Post-secondary Training, and, (10) College; excludes code (12) Other.
26	Section 159(d)(1)	(K) the average wage of graduates who enter unsubsidized employment--(i) on the first day of such employment; and (ii) on the day that is 6 months after such first day;	Graduate Wage at Placement	Sum of hourly wages of graduates initially placed in an unsubsidized job including the military $\frac{\text{Number of graduates initially placed in an unsubsidized job including the military}}{\text{Sum of hourly wages of graduates initially placed in an unsubsidized job including the military}}$	Required by CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	Wages from the first job placement (as opposed to subsequent placements in the placement window) are used to calculate this average.
27	Section 159(d)(1)		Graduate average wage after 6 months of employment	Sum of hourly wages of graduates placed in an unsubsidized job including the military approximately 6 months after initial placement as reported in their Q2 or Q4 survey $\frac{\text{Number of graduates who reported through the WIOA surveys that they were in an unsubsidized job, including the military, at approximately 6 months after initial placement}}{\text{Sum of hourly wages of graduates placed in an unsubsidized job including the military approximately 6 months after initial placement as reported in their Q2 or Q4 survey}}$	Required by CTS provider, Not Yet Established	Nationally, by Center, by CTS provider	Job Corps reports a proxy measure as data are not available to report wages at the 6-month after the first day of employment (since the 6-month/12-month follow up surveys were discontinued to allow for the new Q2 and Q4 WIOA surveys). The proxy measure is calculated using data reported in the Q2 and Q4 surveys where an initially placed graduate's 6-month after initial placement period falls within a window of 5-7 months of either their Q2 or Q4 reporting period. These results cannot be calculated until late Fall 2020 after all Q2 and/or Q4 surveys of the PY 2019 initially placed graduates have been completed.

Job Corps Annual WIOA Report for PY 2019
Summary of Report Indicators

#	WIOA Citation	WIOA Language	Specific Indicators	Definition	Requires Goals/Targets or Expected Level of Performance be Established?	Report Results:	Specification Details ¹
28	Section 159(d)(1) (referenced in Section 159(c)(2)(B))	(L) the percentages of enrollees described in subparagraphs (A) and (B) of section 145(c)(1), as compared to the percentage targets established by the Secretary under such section for the center;	Percent of In-State Enrollees	$\frac{\text{Number of enrollees that entered a Job Corps center in their home State}}{\text{Number of enrollees in the reporting period}}$	Required by center and OA provider, Not Yet Established	Nationally, by Center, by OA provider	
29		Note, Section Sec 145(c)(1): "...the Secretary shall [...]" establish targets, applicable to each Job Corps center, for— (A) the maximum attainable percentage of enrollees at the Job Corps center that reside in the State in which the center is located; and	Percent of Within Region Enrollees	$\frac{\text{Number of enrollees that entered a Job Corps center in their home region}}{\text{Number of enrollees in the reporting period}}$	Required by center and OA provider, Not Yet Established	Nationally, by Center, by OA provider	Region is defined as the six Job Corps regions.
30		(B) the maximum attainable percentage of enrollees at the Job Corps center that reside in the region in which the center is located, and in surrounding regions.	Percent of Surrounding Region Enrollees	$\frac{\text{Number of enrollees that entered a Job Corps center in surrounding regions}}{\text{Number of enrollees in the reporting period}}$	Required by center and OA provider, Not Yet Established	Nationally, by Center, by OA provider	Region is defined as the six Job Corps regions.
31	Section 159(d)(1) (referenced in Section 159(c)(2)(B))	(M) the cost per enrollee, which is calculated by comparing the number of enrollees at the center in a program year to the total budget for such center in the same program year;	Cost per enrollee	$\frac{\text{Total cost per center per PY}}{\text{Number of enrollees in the PY}}$	Required OA provider, Not Yet Established	Nationally, by Center, by OA provider	Data and calculation to be completed by OPDR using the count of PY new enrollees as the denominator.
32	Section 159(d)(1)	(N) the cost per graduate, which is calculated by comparing the number of graduates of the center in a program year compared to the total budget for such center in the same program year;	Cost per graduate	$\frac{\text{Total cost per center per PY}}{\text{Number of graduates in the PY}}$	No	Nationally, by Center	Data and calculation to be completed by OPDR using the count of PY graduates as the denominator.

¹**Overarching Specifications:**

NOJC decided on the following policies/rules **for the purposes of reporting WIOA legislation outcomes**: 1) re-enrollments: credits will be given for each enrollment based upon the achievements attained during that enrollment and the placements entered after that enrollment (note: re-enrollment in Job Corps is not credited as a placement); 2) the center of separation will receive all credits earned by the student for regular transfers; 3) the center of separation will receive all credits earned by the student for AT transfers; 4) the last CTS provider will receive all credits for CTS transfers; and, 5) no flow-back credit will be granted to centers or CTS providers.

25	Number of Graduates Entered Postsecondary Education ³		1,068

Job Corps Annual Report for PY 2019

Section II: National Results

Indicator #	Measure Description	PY19 Result
26	Average Graduate Wage at Initial Placement	\$12.73
27	Average Graduate Wage After 6 Months of Employment	\$14.84
28	Percent of In-State Enrollees	77.9%
29	Percent of Within Region Enrollees ⁵	93.9%
30	Percent of Surrounding Region Enrollees ⁶	6.1%
31	Cost per Enrollee ⁷	\$44,001.28
32	Cost per Graduate	\$96,206.58

NOTES:

¹Students who self-identify as one or more race and Hispanic are included in this category.

²Students who self-identify as having completed 12 years of schooling but did not indicate they received a high school diploma or its equivalent are included in this category.

³Counts of graduates who were placed in the Armed Forces, Apprenticeship programs, a job-training match job or post-secondary education (Measures 16, 17, 20 and 25) are not mutually exclusive. That is, the sum of the number of graduates under each of these four placement categories does not equal the total number of individual graduates. A graduate who enters more than one placement during their placement service window is counted under each type of placement as long as the placement meets the definition for measures 16, 17, 20 and/or 25.

⁴Indicators 18 and 19 respectively present the number of graduates who attained an HSD and HSE while in Job Corps.

⁵"Within Region" is defined as the Job Corps Region in which the center is located.

⁶"Surrounding Regions" is defined as the other five Job Corps Regions and excludes the Region in which the center is located.

⁷Enrollee is defined as the count of new enrollees during PY 2019, and excludes enrollees served during the program year that enrolled prior to July 1, 2019.

++ Results not shown due to concerns with revealing personally identifiable information as counts of students are below 5.

++++ Results not shown due to concerns with the statistical reliability of the information as counts of students are below 50 students.

NOTES:

¹Students who self-identify as Hispanic/Latino alone or with any other race are included in this category.

²Students who self-identify as more than one race except Hispanic / Latino are included in this category.

³Students who self-identify as having completed 12 years of schooling but did not indicate they received a high school diploma or its equivalent are included in this category.

⁴Counts of graduates who were placed in the Armed Forces, Apprenticeship programs, a job-training match job or post-secondary education (Measures 16, 17, 20 and 25) are not mutually exclusive. That is, the sum of the number of graduates under each of these four placement categories does not equal the total number of individual graduates. A graduate who enters more than one placement during their placement service window is counted under each type of placement as long as the placement meets the definition for measures 16, 17, 20 and/or 25.

⁵Measures 18 and 19 respectively present the number of graduates who attained an HSD and an HSE while in Job Corps.

⁶"Within Region" is defined as the Job Corps Region in which the center is located.

⁷"Surrounding Regions" is defined as the other five Job Corps Regions and excludes the Region in which the center is located.

^aBarranquitas and Ramey were closed following damage sustained from Hurricane Maria in September 2017. Ramey reopened for operations in May 2018 and Arecibo reopened in the first quarter of CY 2020. In September 2019 Barranquitas was consolidated with the remaining two centers in Puerto Rico, and the facility was permanently closed.

^bGulfport was severely impacted in August 2005 by Hurricane Katrina; the center reopened part of its campus and began operating at a reduced capacity in April 2010. Planning for the renovations and rebuilding of the remainder of the center facilities to bring the capacity back to the pre-Katrina level of 280 students continues to-date.

^dCascades has been serving as a demonstration project since June 2016, enrolling its first students as the Cascades Job Corps College & Career Academy in May 2017.

++ Results not shown due to concerns with revealing personally identifiable information as counts of students are below 5.

++++ Results not shown due to concerns with the statistical reliability of the information as counts of students are below 50 students.

NOTES:

¹Students who self-identify as Hispanic/Latino alone or with any other race are included in this category.

²Students who self-identify as more than one race except Hispanic / Latino are included in this category.

³Students who self-identify as having completed 12 years of schooling but did not indicate they received a high school diploma or its equivalent are included in this category.

⁴Counts of graduates who were placed in the Armed Forces, Apprenticeship programs, a job-training match job or post-secondary education (Measures 16, 17, 20 and 25) are not mutually exclusive. That is, the sum of the number of graduates under each of these four placement categories does not equal the total number of individual graduates. A graduate who enters more than one placement during their placement service window is counted under each type of placement as long as the placement meets the definition for measures 16, 17, 20 and/or 25.

⁵Measures 18 and 19 respectively present the number of graduates who attained an HSD and an HSE while in Job Corps.

⁶"Within Region" is defined as the Job Corps Region in which the center is located.

⁷"Surrounding Regions" is defined as the other five Job Corps Regions and excludes the Region in which the center is located.

^aBarranquitas and Ramey were closed following damage sustained from Hurricane Maria in September 2017. Ramey reopened for operations in May 2018 and Arecibo reopened in the first quarter of CY 2020. In September 2019 Barranquitas was consolidated with the remaining two centers in Puerto Rico, and the facility was permanently closed.

^bGulfport was severely impacted in August 2005 by Hurricane Katrina; the center reopened part of its campus and began operating at a reduced capacity in April 2010. Planning for the renovations and rebuilding of the remainder of the center facilities to bring the capacity back to the pre-Katrina level of 280 students continues to-date.

^dCascades has been serving as a demonstration project since June 2016, enrolling its first students as the Cascades Job Corps College & Career Academy in May 2017.

++ Results not shown due to concerns with revealing personally identifiable information as counts of students are below 5.

++++ Results not shown due to concerns with the statistical reliability of the information as counts of students are below 50 students.

NOTES:

¹Students who self-identify as Hispanic/Latino alone or with any other race are included in this category.

²Students who self-identify as more than one race except Hispanic / Latino are included in this category.

³Students who self-identify as having completed 12 years of schooling but did not indicate they received a high school diploma or its equivalent are included in this category.

⁴Counts of graduates who were placed in the Armed Forces, Apprenticeship programs, a job-training match job or post-secondary education (Measures 16, 17, 20 and 25) are not mutually exclusive. That is, the sum of the number of graduates under each of these four placement categories does not equal the total number of individual graduates. A graduate who enters more than one placement during their placement service window is counted under each type of placement as long as the placement meets the definition for measures 16, 17, 20 and/or 25.

⁵Measures 18 and 19 respectively present the number of graduates who attained an HSD and an HSE while in Job Corps.

⁶"Within Region" is defined as the Job Corps Region in which the center is located.

⁷"Surrounding Regions" is defined as the other five Job Corps Regions and excludes the Region in which the center is located.

^aBarranquitas and Ramey were closed following damage sustained from Hurricane Maria in September 2017. Ramey reopened for operations in May 2018 and Arecibo reopened in the first quarter of CY 2020. In September 2019 Barranquitas was consolidated with the remaining two centers in Puerto Rico, and the facility was permanently closed.

^bGulfport was severely impacted in August 2005 by Hurricane Katrina; the center reopened part of its campus and began operating at a reduced capacity in April 2010. Planning for the renovations and rebuilding of the remainder of the center facilities to bring the capacity back to the pre-Katrina level of 280 students continues to-date.

^dCascades has been serving as a demonstration project since June 2016, enrolling its first students as the Cascades Job Corps College & Career Academy in May 2017.

In September 2019 Barranquitas was consolidated with the remaining two centers in Puerto Rico, and the facility was permanently closed.

^bGulfport was severely impacted in August 2005 by Hurricane Katrina; the center reopened part of its campus and began operating at a reduced capacity in April 2010. Planning for the renovations and rebuilding of the remainder of the center facilities to bring the capacity back to the pre-Katrina level of 280 students continues to-date.

^dCascades has been serving as a demonstration project since June 2016, enrolling its first students as the Cascades Job Corps College & Career Academy in May 2017.

++ Results not shown due to concerns with revealing personally identifiable information as counts of students are below 5 students.

++++ Results not shown due to concerns with the statistical reliability of the information as counts of students are below 50 students.

NOTES:

¹ Of the five OA agencies with "Percent of Former Enrollees/Level 1 Zero Tolerance Separations" above 90% three are new agencies with contracts that began during PY 2019. New OA agencies tend to have a high percentage of Level 1 ZTs and former enrollees as these are the categories of students who exit from Job Corps earlier (on average, within three to four months after enrollment); graduates do not populate a new OA agency's pools until later as they, on average, remain in Job Corps for almost one year.

²"Within Region" is defined as the Job Corps Region in which the center is located.

³"Surrounding Regions" is defined as the other five Job Corps Regions and excludes the Region in which the center is located.

++ Results not shown due to concerns with revealing personally identifiable information as counts of students are below 5 students.

++++ Results not shown due to concerns with the statistical reliability of the information as counts of students are below 50 students.

NOTES:

¹Counts of graduates who were placed in the Armed Forces, Apprenticeship programs, a job-training match job or post-secondary education (Measures 16, 17, 20 and 25) are not mutually exclusive. More specifically, in calculating each of these four measures, all placements that were reported for each graduate throughout the placement service window are taken into account and a graduate would be included in the count for Measures 16, 17, 20 and 25 for each placement that meets the definition for that Measure.
